

## SOP – Connect a Mac to HNAS

### 1 Connect to HNAS

- 1.1 Open Finder. Click menu "Go / Connect to Server...". Enter the SMB-address and (optionally) click the "plus"-sign to add the address to "Favorite Servers".

- 1.2 Click "Connect". Enter your AKKA-id and password A when asked for.
- 1.3 Now you can access the HNAS-folder. If you'd like you can drag'n drop the folder in the lower part of the Finder-window to the "Favorites"-part of Finder in the upper left tree view.

### 2 List of SMB-addresses

- 2.1 Ask your IT-support for the correct SMB-address. If you're unsure you can browse the network by using your institutions "Common-address":  
<smb://user.uu.se/BMCI/TLA-Common>

Department	TLA (Three/four Letter Anronym)
2.2 Department of Neuroscience	INV
2.3 Department of Pharmaceutical Biosciences	FBV
2.4 Department of Public Health and Caring Sciences	IFV
2.5 Biomedical Centre Campus Management	BMCI
